**COROWARE JOINS VIDYO® PARTNER PROGRAM AS RESELLERS**

Communications and Automation Solutions Integrator Offers VidyoConferencing™

**Redmond, WA – February 24, 2008** – CoroWare Technologies, a subsidiary of CoroWare, Inc. (OTCBB:CROE) announced today that it has partnered with Vidyo, Inc. as a reseller of the VidyoConferencing™ product line. Beginning today, CoroWare is offering affordable, high-definition (HD) video conferencing solutions for enterprise customers.

The unparalleled design of the VidyoConferencing product gives companies an easy, cost-effective way of offering a high-definition multi-point video conferencing solution that can be deployed in conference rooms and on individual desktops. The resulting benefits are decreased travel expenses, increased productivity and a reduced carbon footprint. This high-quality video conferencing solution also allows greater opportunity to telecommute, which has proven benefits of employee productivity, retention, and morale.

The VidyoConferencing solution offers users an innovative high-definition teleconferencing experience built around the most recent standard—H.264 Scalable Video Coding (SVC). SVC is unique in that it enables video streaming at multiple resolutions. Vidyo's proprietary implementation of this standard uses the VidyoRouter™ to customize data delivery for each endpoint based on available bandwidth, CPU capability and resolutions desired, and without interrupting other participants. Participants can simultaneously use a variety of existing equipment from inexpensive microphones to high-end HD cameras.

“CoroWare understands the technology and vision behind Vidyo,” said Rob Hughes, Sr. Vice President, Worldwide Sales and Support of Vidyo, Inc. “Their enthusiasm and desire to build a long-term, mutually beneficial relationship is what we look for in a partner.”

Through its partnership with Vidyo, CoroWare will offer a unique combination of telepresence products and services to customers including installation and configuration that is ready-to-use. By delivering a turn-key solution, CoroWare telepresence consultants help customers maximize their technology investments and minimize travel time and expenses. A wide array of customers can benefit from CoroWare's telepresence solutions, including businesses focused on education, training, healthcare, product demonstration, law and finance to name a few.

“As we become more conscious of budgetary and environmental constraints, businesses are demanding higher quality telepresence solutions that can effectively reduce travel, conserve resources and enable telecommuting.” said Lloyd Spencer, CEO of CoroWare Technologies. “Our reseller partnership with Vidyo will help CoroWare offer our customers the video conferencing solutions they demand.”

CoroWare will begin offering live demonstrations in March of 2009. For more information about VidyoConferencing and to schedule a demonstration, please visit [www.coroware.com/vidyo](http://www.coroware.com/vidyo).

### **About CoroWare**

Headquartered in Redmond, WA with employees and partners around the world, CoroWare Technologies is a company built on integrity, ingenuity, and good old-fashioned hard work. CoroWare specializes in providing communications and automation products and services to optimize the technology investments of enterprise customers. Offering a broad spectrum of customized customer-focused solutions, including telepresence, unified communications, and robotics, CoroWare provides the flexibility of a small company with international resources to design the right-sized solution at the right price. CoroWare experts understand the challenges you face to keep your business running smoothly, meet project deadlines, implement innovative ideas, and stay within budget.

### **About Vidyo**

Vidyo, Inc., headquartered in Hackensack, NJ, is making personal telepresence a reality. Comprised of some of the industry’s best engineers and researchers, Vidyo has developed the first new video conferencing architecture in decades. Vidyo enables people to communicate effectively by using HD quality video from wherever they happen to be. VidyoConferencing is easy and affordable to use by anyone whenever they want, and deploys simply over any IP network. Leveraging Vidyo’s unique intellectual property built upon the new H.264 Scalable Video Coding (SVC) standard, Vidyo delivers the industry’s best resilience and lowest latency video conferencing over converged IP networks. Vidyo’s technology for OEMs and end-to-end product solutions for organizations are able to support point-to-point and multi-point connections that include a variety of different platforms ranging from Mac & Windows desktops to dedicated room solutions.
